Rachit Pokhrel

Full-Stack Developer

Japan | rachitpokhrel123@gmail.com | rachitpokhrel.com.np | github.com/rachitpokhrel173

SUMMARY

Full-stack developer based in Japan. I build business websites and the admin systems behind them, including inquiry and booking flows, quotations, invoicing, inventory and content management, using Next.js, React, TypeScript and Supabase (PostgreSQL). My recent work includes two website-and-admin systems for event decoration businesses in Nepal and a multi-page website with interactive planning tools for a study-abroad consultancy.

TECHNICAL SKILLS

Frontend	React, Next.js (App Router), Tailwind CSS, React Hook Form, TanStack Query, Radix UI, Framer Motion, GSAP, Vite*, React Router*
Backend	Next.js server actions & route handlers, Supabase Auth, Zod validation, PDF generation*, Transactional email (Resend)*, Node.js*, Express*
Databases	PostgreSQL, Supabase, Row-level security, SQL migrations, Drizzle ORM*, MySQL*
Languages	TypeScript, JavaScript, SQL, HTML & CSS
Tools & workflow	Git, npm, ESLint, Responsive design, Technical SEO
Deployment & infrastructure	Vercel, Supabase storage, Custom domains & DNS*, Scheduled jobs (Vercel Cron)*

* Used in a project that is still in development.

PROJECTS

Floral Roots & Decor Business website + admin system — Handed over Sep 2026

- Built a public website with online booking, a contact form and shareable quotation pages, plus an admin system for bookings, quotations, invoices, payments, inventory, staff and reports.
- Modelled the data in PostgreSQL (Supabase) through 14 SQL migrations with row-level security, and fixed a booking-insert issue with a transactional database function so customer data stays private.
- Tested on desktop and mobile and handed over to the client in September 2026.

Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, TanStack Query, React Hook Form

Timeless Ties Events & Decor Business website + admin system — Under development

- Building a public website and admin system covering leads, quotations (versioned, PDF, client acceptance by private link), bookings, events, inventory, finance and a content editor.
- Enforced access with PostgreSQL row-level security, tested by a script that checks each role's permissions, and added database-backed rate limiting for public forms.
- Deployed on Vercel with a custom domain. The public site is live and the admin is in active development.

Stack: Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Drizzle ORM, Zod

Discovery Pathway Business website — Live

- Built a 20+ page website for a study-abroad consultancy, with eight data-driven destination guides and a destination comparison.
- Built interactive tools (cost calculator, course finder, IELTS reading practice) and a validated, rate-limited consultation form.
- Added SEO foundations, including metadata, sitemap and JSON-LD structured data.

Stack: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, GSAP, React Hook Form, Zod
